

I am writing to let you know that K-Love is a vital service to me personally and also to my family. It is educational, informational and uplifting. It promotes a sense of peace and happiness that effect me, which ultimately effect my community as I interact with others in a kinder happier manner. It has a positive influence on our teenage children, helping them to lead more productive and caring lives. We as a family greatly believe that there would be a negative effect on us and also on our community (since many others here also listen to K-Love) if it was displaced by an LPFM broadcaster. It is in the best interest of the public to provide the services of K-Love since all of us and us a kinder, happier and more caring community---which K-Love promotes. Thank you very much for your attention in this matter. Lora Frostman and family
